SUMMARY

I am a highly skilled DevOps Engineer with experience in large scale enterprise systems and networks, virtualization environments and software development. I thrive in an environment where teamwork is important, but can work on my own projects. My interests include Automation, Containers, scripting (Python/Shell/GO), web development, Linux System Administration, Databases and cloud technologies (AWS, GCP, Digitalocean). Other areas of interest include network infrastructure (NOC) and security (IDS/IPS)

WORK EXPERIENCE

Netzary Infodynamics

Devops Engineer

(November 2019 - Present)

I started working here as a junior DevOps engineer for some third-party clients. After almost one year they promoted me as senior DevOps Engineer/consultant.

EDUCATION

Sarswati Vidya Mandir SS School

High School All Subject

7.4

MGS Inter College

Intermediate PCB

70.3%

PROJECTS

Security Upgrader

https://gitlab.com/as_abhi6776/security-patch-shell

It is a shell script-based security patch upgrader and it has a rollback feature. I have automated this thing using Ansible.
